Innovative Solutions for the Truck and Bus Industry
Founded in 1924, LORD is a diversified technology leader with unique expertise in chemical material sciences and mechanical dynamics, providing innovative adhesive, coating and motion management solutions, sensing technologies, as well as magnetically responsive technologies that significantly reduce risk and improve product performance.

Our technical expertise is built on decades of experience and knowledge in engineering and science. Customers say our technical support is one of our defining strengths.

We provide value to our truck and bus customers by collaborating closely with them on product design, process engineering and product performance. Our knowledge and experience in solving problems in a variety of industries allows us to help them increase productivity, reduce operating costs, improve operator comfort and safety, and increase uptime.

Our solutions include the following:

- LORD® Elastomeric Mounts & Bushings
- Fluidlastic™ Cab Mounts
- Advanced Suspension Systems
- Tactile Feedback Device (TFD®) Steering Unit for Steer-by-Wire (SbW) Systems
- LORD Microstrain® Sensing Systems
- LORD® Structural Adhesives

Our product portfolio includes thousands of standard parts that allow us to address most motion and noise problems. However, our engineers can also design and develop new innovative, customizable solutions for our customers’ needs.

If you have an issue that you would like our company to analyze, please contact your local LORD representative or visit www.lord.com.
